

ABDULLAH MOHAMMED HAZEQ

Solutions Engineer | Technical Consultant | Client-Facing Problem Solver

+971 507 826 347 | ahazeq.mena@gmail.com | linkedin.com/in/abdullahmhazeq | github.com/KiritoH4Z3 |
Dubai, UAE

PROFILE

Adaptable Computer Science (AI) graduate who sits naturally at the intersection of technology and people. I am the person who understands the problem, designs the solution and communicates it clearly to whoever is in the room, whether that is an engineering team or a non-technical client. I have led a 12-person committee and a 100+ member organisation, deployed AI systems across 20+ production agents, presented business cases to C-suite executives and shipped automation that cut reporting time by 60%. My strength is not being the deepest specialist in any single tool. It is being the versatile bridge who can learn any domain quickly, coordinate the people who deliver it and turn complexity into something a client actually understands and trusts. I am early in my career, and that is exactly why I adapt fast, take ownership and bring energy to every room I am in.

WHAT I DO BEST

- ▶ **Translate between technical and non-technical worlds:** I explain complex systems in plain language, which lets me sit comfortably with engineers and with business stakeholders in the same meeting
- ▶ **Lead and coordinate teams under pressure:** 2.5 years directing operations for a 100+ member organisation, managing a 12-person committee and delivering events for 200+ attendees
- ▶ **Own client-facing problem solving end to end:** I run discovery, scope the solution, propose the approach and present it, then follow through to delivery and sign-off
- ▶ **Build with AI and automation:** I design and deploy AI-powered workflows and ship working solutions rather than just advising on them
- ▶ **Adapt to any domain quickly:** I onboarded onto three different technical environments in under two weeks each during my internship, and I treat every new field as a fast learning sprint

PROFESSIONAL EXPERIENCE

AI Automation Analyst (Freelance)

Apr 2026 - Present

Self-Employed | Dubai, UAE

- ▶ **Ran full client engagements end to end:** scoped requirements through structured discovery, proposed solution approaches and delivered 3 shipped AI automation solutions to client sign-off with no technical oversight
- ▶ Reduced client reporting time by 60% by designing Python and LLM-powered pipelines that automatically collected, cleaned and structured data from 50+ sources into client-ready outputs
- ▶ Acted as the single point of contact for each client, translating technical capability into business value and managing the relationship from brief to live deployment

AI/LLM Engineer - Ambassador (Contractor)

Jul 2024 - Dec 2024

Virtuals Protocol | Remote | Kuala Lumpur, Malaysia

- ▶ **Deployed AI systems across 20+ production agents:** engineered agentic workflows in Python using Hugging Face and LLM APIs, building solutions that handled complex tasks with minimal human intervention
- ▶ Served as the bridge between the technical team and 100+ non-technical stakeholders, communicating system capabilities and supporting adoption across a distributed global community
- ▶ Evaluated solution performance against defined KPIs, diagnosed failure patterns and delivered structured reports that drove measurable improvements across production systems

IT Intern

Sep 2024 - Jan 2025

Majid Al Futtaim (Carrefour) | Riyadh, Saudi Arabia

- ▶ Delivered technical solutions across an enterprise retail environment with a 95% first-contact resolution rate across 100+ documented cases, supporting users across Finance, Operations and Retail
- ▶ **Mapped business problems to solutions:** conducted workflow walkthroughs, identified inefficiencies and built Python and SQL automation that reduced repeat escalations by 30% in the first month
- ▶ Adapted rapidly across multiple technical domains, onboarding onto new systems and tools in under two weeks each while maintaining delivery quality

Head of Operations (Volunteer)

Jun 2023 - Nov 2025

APU eSports | Kuala Lumpur, Malaysia

- ▶ Directed all strategic and operational delivery for a 100+ member organisation across 2 consecutive years, leading a 12-person committee with structured onboarding, delegation and performance reviews
- ▶ Coordinated sponsors, venue partners and university administration as primary liaison, aligning competing priorities into single actionable plans and reducing on-site operational failures by 70%
- ▶ Managed budgets and delivered events for 200+ attendees, owning everything from planning through real-time problem solving under live pressure

Lead Event Coordinator (Volunteer)

Mar 2025 - Oct 2025

No Code Collective APU | Kuala Lumpur, Malaysia

- ▶ Led end-to-end planning for a tech community event series, managing logistics, vendor negotiations, budget tracking and post-event reporting to professional standard

KEY PROJECTS

Deepfake Detection Framework | Lead Researcher

Feb 2025 - Sep 2025

Python | TensorFlow | CUDA | EfficientNet | LSTM | Grad-CAM | Grade: Distinction

- ▶ Designed and validated a hybrid deep learning model achieving 80% accuracy on a hold-out test set, independently managing the full 8-month lifecycle from problem framing to deployment-ready delivery
- ▶ Integrated Grad-CAM explainability and diagnosed a spurious-correlation failure mode, demonstrating the analytical rigour to find and fix problems others would miss

APU Campus Congestion Prediction | Lead Developer

Mar 2025 - Apr 2025

Python | scikit-learn | SQL | Random Forest | Business case presentation

- ▶ Built an AI forecasting solution end to end in one month, then presented a structured ROI business case directly to the University COO, who endorsed it. Recognised formally by both the COO and Head of School

Food Recommendation System | Published Researcher, Sole First Author

Jun 2024

Python | TF-IDF | NLP | Collaborative Filtering | JATI Journal, Vol. 8 No. 2 (2024)

- ▶ Published peer-reviewed research as sole first author, independently designing and validating a hybrid model that outperformed single-method baselines across all evaluation metrics

TECHNICAL TOOLKIT

Solutions and Client-Facing: Solution scoping | Requirements discovery | ROI business cases | Technical demos | Stakeholder presentation | Technical-to-business translation

AI and Automation: LLM integration (OpenAI, Claude, Gemini) | LangChain | Agentic workflows | RAG (conceptual) | Prompt engineering | Make | N8N | Power Automate | Zapier

Programming and Data: Python (Pandas, NumPy) | SQL | R | Java | C | C++ | Power BI | Excel | Data pipelines | Statistical analysis

Machine Learning: TensorFlow | PyTorch | Scikit-learn | CUDA | Deep learning | NLP | Model validation

Infrastructure and Tools: Git / GitHub | REST APIs | Linux (Ubuntu) | Cisco networking (CCNA) | Jupyter | VS Code | Microsoft 365 | Figma

Conceptual Knowledge: Vector databases | Docker | Cloud platform fundamentals | CI/CD principles

LEADERSHIP AND ADAPTABILITY

- ▶ **Versatility across roles:** equally comfortable leading a team, presenting to a client, building a technical solution or coordinating a 200-person event. I adapt to what the situation needs
- ▶ **Fast learner by track record:** picked up multiple technical environments in under two weeks each, and taught myself the AI and automation stack I now build with professionally
- ▶ **Communication across audiences:** I adjust how I explain things depending on whether I am talking to an engineer, an executive or a first-time user, a core requirement of any solutions role
- ▶ **Calm under pressure:** years of live event operations taught me to solve problems in real time without losing composure

EDUCATION

B.Sc. Computer Science - Artificial Intelligence

Nov 2022 - Apr 2026

Asia Pacific University (APU) | Kuala Lumpur, Malaysia

Graduated April 2026 | Specialisation: Machine Learning, Deep Learning, NLP, AI Systems

- ▶ Distinction-grade capstone and published peer-reviewed researcher during undergraduate study

High School Diploma - Commerce and IT

Apr 2020 - Jun 2022

International Indian School | Riyadh, Saudi Arabia

Aggregate: 81.3%

EXTRAS

Certifications: Cisco CCNA (Routing and Switching) | IBM Introduction to Software Engineering

Publication: JATI Journal, e-ISSN: 2600-7304, Vol. 8 No. 2 (2024), Hybrid Filtering research, sole first author

Languages: English (Native / Bilingual) | Urdu (Conversational) | Hindi (Conversational)

Interests: Competitive gaming | Sim racing and go karting | Photography | Travel | Sports
